Vision of Capacity Building Commission

Capacity Building Commission (CBC) was constituted in April 2021 under Mission Karmayogi - National Program for Civil Services Capacity Building (NPCSCB). Mission Karmayogi is a Government of India initiative that aims to transform capacity building efforts across different levels of government to improve the execution capacity of civil servants and foster citizen-centricity.

CBC wishes to strengthen the capacity of civil service training institutes across the country. Central government overlooks around 1100 training institutes including 25 Central Training Institutes (CTIs) and 33 State Administrative Training Institutes (ATIs). The faculty at these training institutes forms the anchor for success of training of public service officials.

Faculty Development Program - Ideation

Capacity Building Commission under its efforts for building state capacity wishes to train all the faculty in civil service training institutes by March 2024. The faculty in these CSTIs have a rich field experience, which is highly relevant to train officers for ensuring high performance and better delivery of public service. These faculty lack the scientific acumen of teaching effectively. This hypothesis - is validated by roundtable discussion with faculties, as well as a pilot program and its evaluation facilitated by CBC. To ensure the fulfilment of this crucial gap, CBC has planned a two-phase intervention to build capacity of faculties across CSTIs. 60 percent of the faculty in CSTIs should be civil service practitioners, who bring the richness of their experience to their training in the training institutes. The practitioner's experiences backed by academic theories and frameworks can form the foundation for enhancing the capacity of the learners.

By training the CSTIs' faculty, they will be encouraged to:

a. Utilise their experiences in civil services in the shadow of academic theory to bring the attention of their learners towards impact, and achieving positive outcomes in their service towards the nation and its citizens.
b. Approach training at their CSTIs with a facilitative approach, to motivate their learners for utilizing opportunities of upgrading their skills and adapt a citizen-centric service delivery mindset.
c. Conduct training based on adult learning and learning design principles to place the context of their learning which is most relatable to their learners.

d. Run training programs that rely on reflection, feedback on practice and peer-driven processes for enhancing learning and co-creating contextual learning content.
e. Build a body of knowledge and best practices to highlight achievements of Indian public administration as well as promote these practices for global learning.

The two-phase intervention

Through the planned two-phase intervention, CBC wishes to build an internal capacity within the government ecosystem for faculty development. The master trainers trained in level 2 of the faculty development program as mentioned below will create a diverse pool of master trainers who will continue to be trainers on faculty development and can be utilised by any civil service training institute.

Phase 1: Mandatory online self-paced training of 6-8 hours:

This online training on iGOT platform will cover the theoretical aspects to understand the process of learning and teaching in a scientific manner. This level-1 training program will cover associated theories and principles that help design and deliver an effective training program, as well as help appreciate the process of change through a teaching intervention.

This training program is a mandatory undertaking for any faculty being posted to a CSTI, irrespective of the nature and duration of their tenure. Completion and performance on this program will be certified by Capacity Building Commission.

Phase 2: Advanced faculty development programs for selected faculty

CBC will host advanced faculty development programs for selected 100-150 faculty members from across the CSTIs. The CSTI heads nominating faculty for these programs will make sure that the participant is a senior faculty who will continue to stay in the training ecosystem for at least another year, and will create a corresponding impact in their own institute. Further, these faculty will be listed as master trainers by CBC and will continue to train the faculty from other institutes. The faculty development programs planned for the selected cohort are as below:

S.no.	Level-2 programs (for upto 40 participants)	Number of batches
1	Teaching Effectiveness	3 batches
2	Training impact assessment	1 batch
3	Technology-enabled learning	1 batch

Pilot faculty development programs facilitated by CBC:

I. Pilot Faculty Development Program for a homogeneous mixture of 40 officers from National Academy of Customs, Indirect Taxes and Narcotics (NACIN)

The pilot faculty development program for NACIN officers conducted by SP Jain Institute of Management and Research (SPJIMR), and facilitated by Capacity Building Commission was conducted in June 2023 at NACIN's campus in Bangalore. The program covered the theories of teaching effectiveness as well as elements of course design. This program, based on the intended program objectives and utilized learning design was piloted as a **level 1 program**. This program also helped **assess actual gaps in teaching and learning sciences in a CSTI faculty.** A pre and post-assessment of the associated factors of teaching effectiveness were done for the participants. Out of 40 participants, 32 of them self-assessed themselves on both pre and post-stage, whose responses have been analysed for the below inferences.

Pre and post-assessment analysis on factors of teaching effectiveness

In a self-assessment done by the participants, they were asked to record their confidence levels in utilizing the below-mentioned techniques and attitudes in their role as a faculty. The responses were scored on a scale of 0 to 5, with 5 representing the highest confidence.

S.no.	Parameter	Pre-assessment score (Average on a scale of 5)	Post-assessment score (Average on a scale of 5)
1	Practising adult learning principles	1.3	4.1
2	Utilizing learning facilitation	2.0	4.4
3	Utilizing Learning design principles	2.8	4.1
4	Facilitating reflective learning	2.9	4.1
5	Encouraging immersive learning experiences	2.1	3.9
6	Co-creating content	2.5	3.8
7	Enabling coaching and feedback	3.1	4.4
8	Ensuring long-term training impact	3.2	4.1
9	Building futuristic capabilities	3.6	4.3
10	Developing digital comfort	3.6	4.2
11	Transacting field experiences through academic frameworks	1.9	3.2
12	Measuring impact	2.8	3.9
13	Staying true to the role of a trainer in the face of challenges	3.6	4.3
	Overall average	2.73	4.07

The score on a scale of 5 in the table above represents the average of confidence level (scored to their corresponding responses). The options and corresponding responses can be referred to in the pre-assessment questions attached in Annexure 1.

Highlights of the assessment:

a) The program recorded **an overall delta of 1.35 on a 5-point scale**. This can be read as an immediate delta or the cognitive gain from the program.
b) 9 out of 13 parameters recorded a delta of more than 1.
c) **Practising adult learning principles, utilizing learning facilitation and encouraging immersive experiences** recorded the topmost change in terms of confidence in utilizing them. The respective values of change on a 5-point scale are 2.8, 2.4 and 1.8.
d) High confidence level for using learning design principles (score 4 or above) was recorded by 42% of participants before the program and 75% of participants immediately after the program, thus transitioning 33% of participants to higher confidence levels.

The above analysis highlights the important and urgent need to address the cognitive gap in teaching principles and methodologies. To capture the scale, i.e., large number of faculty across the civil service training institutions, CBC will utilise the program design of the pilot FDP at NACIN, and transform it into an effective online program. This program will be mandatory for all the faculty. The elements of program design to be incorporated into the online program have been mentioned in the above section.

II. Pilot Faculty Development Program facilitated by CBC for a heterogeneous mixture of 27 officers conducted by Indian School of Business (ISB)

The pilot faculty development program conducted at YASHADA, Pune in the month of August invited a heterogeneous mixture of senior faculty from CTIs (Central Training Institutes) and ATIs (Administrative Training Institutes) across the country. Faculty from a total of 14 institutes participated and fulfilled the below criteria. The criteria for nomination ensured to invite those faculty who would create maximum impact back at their institutes post the workshop.

1. Officers who have completed 5 to 7 years of service and are passionate about being a faculty at the academy, and,
2. Officers who have spent at least 1 year at the academy in faculty roles and who have 1 year ahead of them at the institute,

The following 14 institutes participated in the Faculty Development Program

BPRD/Central Detective Training Institute, Hyderabad
BPRD/Central Detective Training Institute, Chandigarh
BPRD/Central Detective Training Institute, Jaipur
BPRD/Central Detective Training Institute, Kolkata
National Academy of Direct Taxes, Nagpur
National Academy of Customs Indirect Taxes & Narcotics
Meghalaya Administrative Training Institute, Shillong
Indira Gandhi National Forest Academy, Dehradun
National Academy of Indian Railways (NAIR), Vadodara
Institute of Government Accounts & Finance, Delhi
Rafi Ahmed Kidwai National Postal Academy, Ghaziabad
Sardar Vallabhbhai Patel National Police Academy, Hyderabad
Yashwantrao Chavan Academy Of Development Administration (YASHADA), Pune
Kerala institute of Local Governance, Cochin

The faculty development program conducted by ISB was intended as a pilot level 2 program or an advanced program. The program focused on two main themes of mega-trends in education and how technology is changing the space of education. The program relied on the participation of the learners through discussions, group work on case discussions and simulations. The participants expressed that the program contributed in enhancing their skills as a faculty, and rated the program at an average of 4.67 out of 5.

Learnings from pilot faculty development programs

The pilot programs provided an on-ground understanding which will be included in devising future programs as mentioned in the strategy above.

1) Providing a space for the participants - either from the same institute or different ones - to share their challenges as a faculty facilitated the openness for camaraderie, and connect with each other as peer learners. This also facilitated the process of learning, by learning from each other.
2) A hands-on experience is useful for the participants to gain insights and perspective of their peers, and to reflect upon and utilise the learnings for their own teaching practices.
3) Contextualising the content of the program in terms of case studies referred to, or examples used is a gap that needs to be filled in the further design of these programs.

Program elements for upcoming faculty development programs:

The faculty development program - either online or in physical mode should ensure the 3 factors to provide maximum learning output to its participants - relevance, relatability and applicability.

Ensuring that the content is relevant for the faculty of CSTIs is extremely important, and has been a constant feedback from programs which engaged experts from management institutes. The knowledge partners who will conduct further FDP for CBC and associated CSTIs will have to ensure that the context of examples utilised in the teaching program are from the Central or State government and address the issues relevant to the public administration ecosystem. Similarly, the teaching techniques, methodology or principles taught through faculty development programs should be relatable to the participants keeping in mind their context as well as the context of their learners. The faculty participating in FDP should also be able to use their learnings back at their institutes immediately after the programs, ensuring an immediate and a sustained change.

The suggested broad topics to be covered in the faculty development programs at both stages are mentioned in the table below.

Online FDP (level 1)	FDP in physical mode (level 2)
a) Realising the role of a facilitator b) Introduction to the elements of	The advanced FDP, a 3-4 day in-person program should build on the online FDP

course design, from training needs analysis upto the assessment design of the course. c) Adult learning and learning design principles d) Foundation principles such as Bloom's taxonomy, Kolb's experiential learning cycle, etc. e) Introduction to diverse pedagogical techniques such as case writing, flipped classroom etc. f) Evolving ecosystem of education space with technology	and take the learning experience beyond it to provide a hands-on-experience to the participants. The selected faculty for this program should be engaged closely and encouraged to demonstrate the skills of their role as a faculty. Techniques such as demo classes, facilitating case teaching, participating in flipped classrooms, etc, can be utilised in the design of the advanced/level 2 faculty development program.

Annexure 1: Pre-Assessment for level 1 pilot FDP for a homogeneous mixture of officers from NACIN

Parameter	**Tool** Pre-Assessment Self-assessment for a learner	Rating scale	Scoring
Practising adult learning principles	How confident do you feel in practising adult learning principles in your teaching? (Addressing the challenges of adult learning, and utilising the motivations of adult learners.)	a) I am not aware of the adult learning principles b) I am aware of the adult learning principles but not confident in applying them for my teaching c) I can use adult learning principles in my teaching but I am not aware of how to measure their effectiveness towards learning d) I can use adult learning principles, review, consult and improvise to ensure maximum learning impact	(a) 0 (b) 1 (c) 3 (d) 5
Utilizing learning facilitation	How confident are you about facilitating learning among your trainees? (The ability to facilitate practice and reflection for the learners, and transfer control to the learners)	a) I cannot distinguish learning facilitation from regular teaching b) I know about facilitating learning but am not equipped with knowledge of applying it in my teaching sessions c) I can aim for facilitating learning among my trainees but I am not sure	(a) 0 (b) 1 (c) 3 (d) 5

		about its effect on learning d) I can facilitate learning for my trainees, and improvise based on the cohort of trainees' to ensure maximum learning impact	
Utilizing Learning design principles	I ensure that I plan my teaching sessions as per learning design principles. (Being an artist, creating experiences to ensure learning and citizen-centric service delivery. Being able to prompt learners to practice what they learn and help them adapt new skills or ways of working ensures the success of training.)	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5
Facilitating reflective learning	I ensure reflective learning in all my teachings. (Reflection is a necessary part of the learning cycle for engaging with theory and learning content, understanding it in one's own context and determining its applicability. Engaging in numerous observations, feedback dialogues, and active experimentation activities.)	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5

Encouraging immersive learning experiences	I am confident in creating immersive learning experiences for my trainees. (Creating spaces to encourage conversations and discussions around learning and create a community of practice among their learners. This offers social, emotional and practical support to learners for development.)	a) Not confident b) Learned, but not confident c) Somewhat confident d) Completely confident	(a) 0 (b) 1 (c) 3 (d) 5
Co-creating content	How confident do you feel in co-creating content for any training involving perspectives from relevant stakeholders? (Co-creating content either at the stage of design, or during the program through open-ended sessions is a way to ensure that the training is not placed out of the context of the learners.)	a) Not confident b) Learned, but not confident c) Somewhat confident d) Completely confident	(a) 0 (b) 1 (c) 3 (d) 5
Enabling coaching and feedback	I am confident in coaching my trainees and provide relevant feedback. (Feedback is a critical factor of a training program for improving practice. Individual feedback based on observed behaviors challenges learners as well as	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5

	guides them towards growth.)		
Ensuring long-term training impact	I aim for long-term training impact through feasible interventions post the training session. (Keeping the focus on reinforcing learnings over time, motivating learners to be invested in their learning and prompting them to practice what they have learnt at their jobs over time will reflect the impact of training and thus, the effectiveness of training sessions.)	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5
Building futuristic capabilities	I am confident in adapting to the latest teaching methodologies and medium (digital/phygital) of teaching. (Upgrading one's knowledge with evolving teaching methodologies, and evolving learners in the age of information.)	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5
Developing digital comfort	I am confident in utilising digital learning tools to ensure optimum learning through digital or phygital learning mediums. (Adapting to the philosophy	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5

	of learning from anywhere, anytime empowered by digital empowerment, and utilising it to the benefit of teaching.)		
Transacting field experiences through academic frameworks	How confident are you to build a course on a theme relevant for your trainees comprising of academic frameworks? (Putting all the learnings from the field into frameworks that could be taught into a classroom, thus, opening new doors of opportunity for learning for the trainees as well as the world outside.)	a) I like the idea, and I am eager to know how to make it possible b) I appreciate the idea, and I have been trying to do so for some time c) I enjoy this technique of using my field experiences to train my trainees d) I utilise this approach confidently in all my teaching sessions	(a) 0 (b) 1 (c) 3 (d) 5
Measuring impact	I confidently deploy techniques and tools to measure the impact of my training on trainees and their performance. (Ensuring adequate measurement of immediate takeaway of knowledge, impact on the performance of the trainees post several months of the training, as well as the changes in behaviors of the trainees.)	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5

Staying true to the role of a trainer	I confidently overcome challenges I face as a trainer, to stay true to ensure learning for my trainees.	a) Not like me at all b) Not much like me c) Somewhat like me d) Mostly like me e) Very much like me	(a) 0 (b) 1 (c) 3 (d) 4 (e) 5
